Professional Summary

AI Architect and Platform Engineer with 15+ years of progressive experience across Cloud, DevOps, Site Reliability Engineering, and enterprise GenAI systems. Currently Consultant – AI Architect at Hitachi Group, building custom Terraform Providers and GenAI-driven automation tooling. Proven at operating large-scale production platforms — 19 Kubernetes clusters across 7 global regions — and delivering AI systems from scratch, including AI FORGE (enterprise GenAI operations platform on AWS Bedrock) and forge-router (multi-LLM gateway). AWS Certified Solutions Architect with deep expertise in Terraform, GitOps, DevSecOps, observability, and AI platform design.

Core Skills

- **AI / GenAI:** AWS Bedrock, Claude, Gemini, RAG Architectures, Multi-LLM Gateways, LLMops, Multi-Agent Systems, Model Context Protocol (MCP), Vector Databases (OpenSearch, Qdrant, ChromaDB), AI Governance & Guardrails
- **Cloud:** AWS (Solutions Architect), Google Cloud (GCP), Microsoft Azure, IBM Cloud
- **Infrastructure as Code:** Terraform (incl. Custom Provider development – Plugin Framework/SDK), Terragrunt, Ansible, Helm, Policy as Code (OPA/Sentinel)
- **Containers & Platform:** Kubernetes, Amazon EKS, Docker, ArgoCD, OpenShift, GitOps
- **CI/CD:** Jenkins, GitLab CI, GitHub Actions, Azure DevOps
- **Observability & SRE:** Prometheus, Grafana, OpenTelemetry, Dynatrace, Datadog, ELK, Loki, SLI/SLO, DORA Metrics
- **Security / DevSecOps:** HashiCorp Vault, OpenBao, SAST/SCA, Zero-Trust, IAM/RBAC, Secrets Management
- **Languages:** Python, Bash, Groovy, YAML/JSON, SQL, TypeScript

Professional Experience

Hitachi Group — Consultant – AI Architect

Noida, India | Jul 2026 – Present

- Lead development of Custom Terraform Providers using the HashiCorp Plugin Framework (Go), extending automation beyond standard cloud providers to proprietary internal APIs.
- Drive integration of GenAI-powered tooling into infrastructure automation workflows to reduce manual operational effort.
- Provide technical leadership on Kubernetes platform engineering and Infrastructure-as-Code standardization.

Devo Technology — Lead DevOps Engineer / SRE

Noida, India | Apr 2023 – Jun 2026

- Built AI FORGE, an enterprise GenAI operations platform on AWS Bedrock, reducing engineer troubleshooting ramp-up by ~60%.
- Managed 19+ Amazon EKS clusters across 7 global regions using ArgoCD GitOps and Helm.
- Developed a Custom Terraform Provider (Plugin SDK) and standardized Terraform/Terragrunt IaC across APAC, EU, and US regions.
- Architected unified observability (OpenTelemetry + Prometheus + Grafana) with GitOps-managed alerting; integrated Vault/OpenBao to eliminate hardcoded credentials.
- Automated EBS storage remediation (CloudWatch → SNS → Lambda), cutting 45-minute manual on-call responses to 3-minute zero-touch resolution.

GlobalXperts Inc — Senior Cloud Consultant

Noida, India | Feb 2022 – Apr 2023

- Owned production operations for NHL live streaming on AWS MediaLive, MediaConnect, CloudFront, and Route53 under strict SLAs.
- Delivered Terraform-based cloud modernization advisory and built multi-platform monitoring (Datadog, CloudWatch, Grafana).

Hughes Communications India Ltd — Assistant Manager, Cloud & RF Engineer

Noida, India | Aug 2019 – Feb 2022

- Engineered cloud-integrated streaming architectures on AWS for nationwide corporate and government e-learning platforms.
- Deployed hybrid AWS Media Services + VSAT satellite pipelines; led enterprise on-premise to cloud migrations.

Tata Sky Ltd (Tata Sky Binge OTT) — Assistant Manager, Broadcast Operations

Delhi NCR, India | Apr 2012 – Jul 2019

- Governed live transmission for 450+ TV channels and the Tata Sky Binge OTT platform serving millions of subscribers.
- Built serverless AWS Lambda + Step Functions pipelines for transcoding and HLS/DASH packaging.

Essel Shyam Communication Ltd — Broadcast Engineer

Delhi NCR, India | Apr 2010 – Apr 2012

- Ran master control room and playout automation (Harris) for Star India, Disney, Hotstar, and Discovery TV under 24×7 SLAs.

TVS-E Service Tec (Nokia) — Service Engineer

Delhi NCR, India | Aug 2009 – Mar 2010

- Performed chip-level diagnostics and hardware evaluations on mobile platform prototypes.

Key Projects

- **AI FORGE — Enterprise AI Agent Operating System:** Claude Code + AWS Bedrock platform with 11 domain skill modules, persistent cross-session memory, and a zero-secret runtime credential architecture. ~60% reduction in troubleshooting ramp-up.
- **forge-router — Multi-LLM AI Gateway:** Python gateway routing across 8 providers (Claude, Gemini, Groq, OpenAI, Ollama, and more) with health-check-first routing and automatic fallback.
- **Custom Terraform Provider (Plugin Framework):** Go provider extending Terraform to proprietary internal APIs over gRPC — full resource CRUD lifecycle and provider protocol implementation.
- **Production RAG System:** Hybrid retrieval (BM25 + semantic) with cross-encoder reranking, OpenSearch vector store, and LLM observability via Langfuse.

Education

- **MBA — Information Technology & Project Management**, Sikkim Manipal University, 2012
- **B.Tech — Electronics & Communication Engineering**, UPTU Lucknow, 2009

Certifications

- AWS Certified Solutions Architect – Associate (Active, 2023–2026)
- AWS Certified Cloud Practitioner
- ITIL Foundation
- ServiceNow Fundamentals
- Claude 101 — AI Operational Certification (Anthropic)
